

The following describes which requirements/guidelines must be applied for the creation of IMDS/CAMDS entries in order to be able to submit them to MinebeaMitsumi Technology Center Europe GmbH. Deviating entries may lead to delays and rejections.

IMDS Company-ID: **35377**

CAMDS Company.ID: **CA_3_46174**

Requirements for the declaration of materials:

1. The MTCE specification is used as the part designation, no trade names are allowed
2. For transmitted materials, it must be ensured that the correct classification is selected (e.g. no deactivated classifications).
3. Material names must match the classification used, e.g. classification 6.2 must contain keywords such as adhesive
4. Material names must not correspond to trade names, standardized material names must be used
5. If material datasets from the IMDS/CAMDS-Committee are available, these and not self-created datasets should be used
6. The question regarding recyclates must be answered truthfully
7. If available, applicable standards must be specified

Requirements for the information in the recipient status:

1. The part number must be indicated without hyphen/revision.
2. The drawing number must be indicated without hyphen/revision
3. Status/date of the drawing must be taken from the customer drawing
4. The revision must be specified as the change number
5. IMDS/CAMDS-Entries must be submitted via "Suggest" and not via the "Send" button
