

To strengthen our team in Košice, we are searching for a:

Teamleader Embedded Software Development (m/f/d)

MinebeaMitsumi Inc. started with the production of miniature ball bearings in 1951 and is today the largest manufacturer of these products in the world. Based on our own development of precision technologies, additional business segments in the areas of Electronics and Electromechanics were established. MinebeaMitsumi employs over 100,000 people at 163 locations in 27 countries. Products developed by MinebeaMitsumi are used everywhere, whether in aviation, space research, motor vehicles, the computer industry, medical technology or at home.

JOB DESCRIPTION, RESPONSIBILITIES AND DUTIES:

- Disciplinary responsibility for the Software (SW) Design team members
- Responsibility for carrying out the tasks resulting from the international, the European and the national laws (e.g. safety and health care precautions at work), from the company internal regulations (e.g. MinebeaMitsumi Code of Conduct or MDCK guidelines) or from the quality standards (e.g. IATF 16949)
- Planning and Supervising of all team's development activities in agreement with other teams/departments like Project and System Management, Hardware Design, Software Testing, Product Design and Reliability Engineering. It also includes estimation of the development effort regarding development time and cost aspects, preparation of the hardware design related time lines, responsibility for Software Releases
- Maintaining the development standards (software design guideline / software design handbook) and ensuring its practical use by the team members
- Resource and Manpower Management. Progress and Quality Assurance analysis and report based on the team results. Implementation and monthly evaluation of team's Key-Performance-Indicators (KPIs)
- Organisation of the Software Design Development Process including creation of concept and SW architecture, SW simulations, choice of algorithms, creation of SW flowcharts and reporting for different types of SW used in different electronics (e.g. industrial, robotics, medical and automotive etc applications)
- Coordination of the requirement analysis and of the software concept development with colleagues, customers, suppliers and other related departments. Responsibility for Software Design Internal Specification and Task Management within the team based on this Specification
- Design reviews and design approvals for the SW designs in development
- Reviewing and approving test specifications, test plans and test reports
- Preparing and approving of the SW related technical documentation
- Organisation of the cooperation with internal and external partners. Clarification of cost, time line related aspects, coordination of the task definition etc.
- Responsibility for the proper and timely informing of the superiors if arising problems can not be solved within the team
